Ratcheting Gear Puller

- A dual-use ratcheting gear puller can be selfadjusted
- to 2 or 3 jaws according to usage
- The ratchet-style claw structure enables quicker
- and more convenient jaws replacement operation
- The ratchet-style jaw structure allows for swift
- adjustment of the range of use
- Reversible jaws can be used for internal and
- external gears, axles, bearings, etc

Item	Capacity (tons)	Hex (mm)	Jaw (leg)	Spread (A)(mm)	Reach (B)mm	 Kg
