

# Heavy Duty Jack Stand

9TY332 **new**

- This product can be used for supporting heavy objects in auto repair factories, auto 4S shops, factory flow lines etc. But it cannot be used for supporting heavy objects for a long time
- It can also serve as a temporary supporting tool during the conveying of machines and equipment

It is very convenient to adjust the height For the supporting part. Just turn the handle and adjust it to a height you need
