

Transmission Fluid Oil Exchanger

9DJP21

- With oil cycling flow speed monitor
- Clean and replace transmission fluid
- Help to restore gearbox's speeding performance, to reduce vibration and oil consumption
- Suitable for petrol and diesel vehicles

KT NO.	Input voltage	Working pressure	Operating temperature	N.W (kg)	G.W (kg)	CUFT
9DJP21AA-B	220V 50/60Hz	70-90 psi	Less than 80 °C	35.5	38.5	10.88

Water Tank Maintenance Machine

9DJP31

- Vacuum and pressure device provides more efficient service
- Fluid can be exchanged with or without operating the engine
- 100% vacuum extracted for old dirty coolant through the radiator cap and reservoir tank
- Provide quick and easy operation for replacing the new coolant
- Suitable for petrol and diesel vehicles

KT NO.	Input voltage	Working pressure	Operating Temperature	N.W (kg)	G.W (kg)	CUFT
9DJP31AA-B	220 V 50 HZ/1 PH	85-100 psi	Less than 80 °C	30	33	8.82
