

# Spot Welder

## 9CCE1

- Designed for professional auto body repair field
- It provides quick, convenient and precise operation
- Changeable and multi-functional welding gun and accessories
- Simple and practical panel which is very easy to set-up time
- Warning light designed for reminding the overheat situation. It helps prolong the lifetime
- SCR power control device provides high reliability while operation

KT NO.	Input voltage	Input power	Max working current	N.W (kg)	G.W (kg)	CUFT
9CCE11AA-B	380 V 50/60 Hz	19 KVA	5200 A	60	67	8.5
9CCE12AA-B	220 V 50/60 Hz					

# Multi-Function IGBT Inverter Spot Welding

## 9CCF

- Technology digital IGBT inverter provides the reliable system and better welding quality
- Suitable for repairing various vehicles steels such as conventional steels, stainless steels, and so on
- Various welding functions: spot welding, dent pulling, shrinking, mash seam welding, and so on
- Inverter technology improves the productivity and helps save energy around 50%
- Overheat protection
- Stepless current regulation
- Automatic voltage monitoring

KT NO.	Input voltage	Input power	Max working current	N.W (kg)	G.W (kg)	CUFT
9CCF31-1AA-B	220V/380V 50/60Hz	6.5 KVA	2600A	42	47.5	10.07
9CCF41-1AA-B	220V/380V 50/60Hz	6.3 KVA	2500A	42	47.5	10.07
